

PROPERTY FRONTIERS INVESTOR SURVEY FINDINGS 2011

"Trustworthy, ethical and customer-focused"

OVERVIEW

Here at Property Frontiers we pride ourselves on delivering the very best global investment opportunities which meet our clients' requirements and like to think that we are customer centric and very much in tune with what our investors are looking for.

As we conclude a very successful 2011 and eagerly approach 2012, we decided to conduct a client survey in order to discover what you and our investors want to invest in and where.

In summary, our findings reaffirmed to us that Capital Growth was of most importance to the majority and that property within the UK was the most sought-after with the BRIC economy of Brazil and Turkey also in high demand.

Interestingly it appears that lifestyle investments in the form of Holiday Homes remain the most preferred investment choice just pipping UK Buy-to-Let yet an impressive three-quarters would consider alternative or eco products in the future.

Direct client feedback on Property Frontiers' service was very positive but most encouraging of all was that over half of respondents had invested in the last 12 months – a sure sign that investor confidence has returned and the market, albeit slowly, is once again on the move.

The next 12 months promises the delivery of more high performing investment opportunities from around the world.

We welcome all feedback so if there is a market or product you are interested in investing in please [let us know](#) directly.

Ray Withers, Managing Director, Property Frontiers

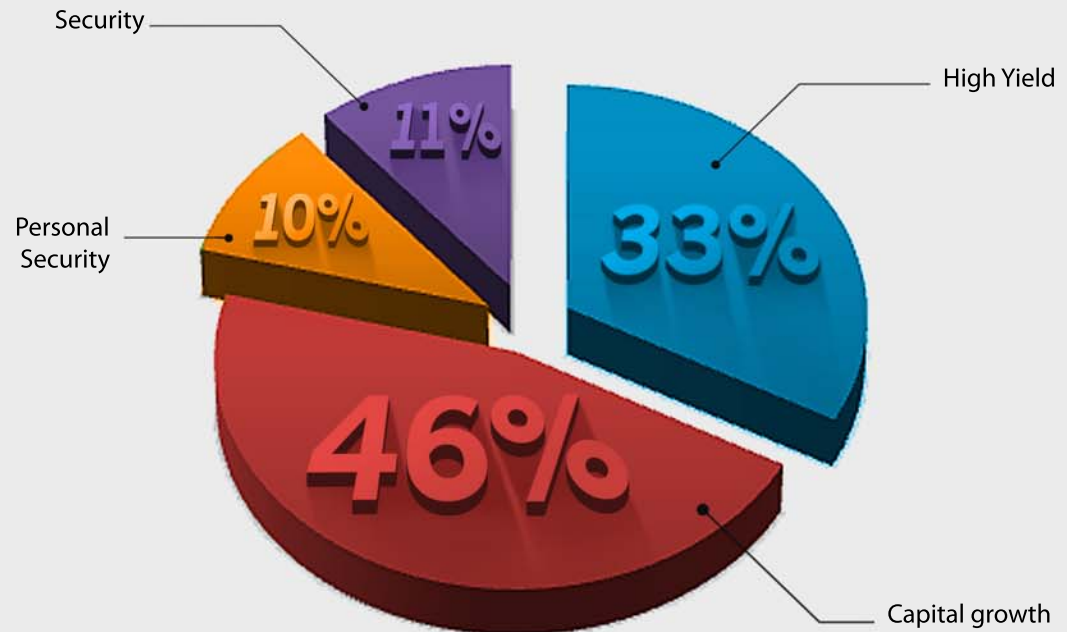

Nearly 3/4 of Property Frontiers clients regularly use social networking sites such as...

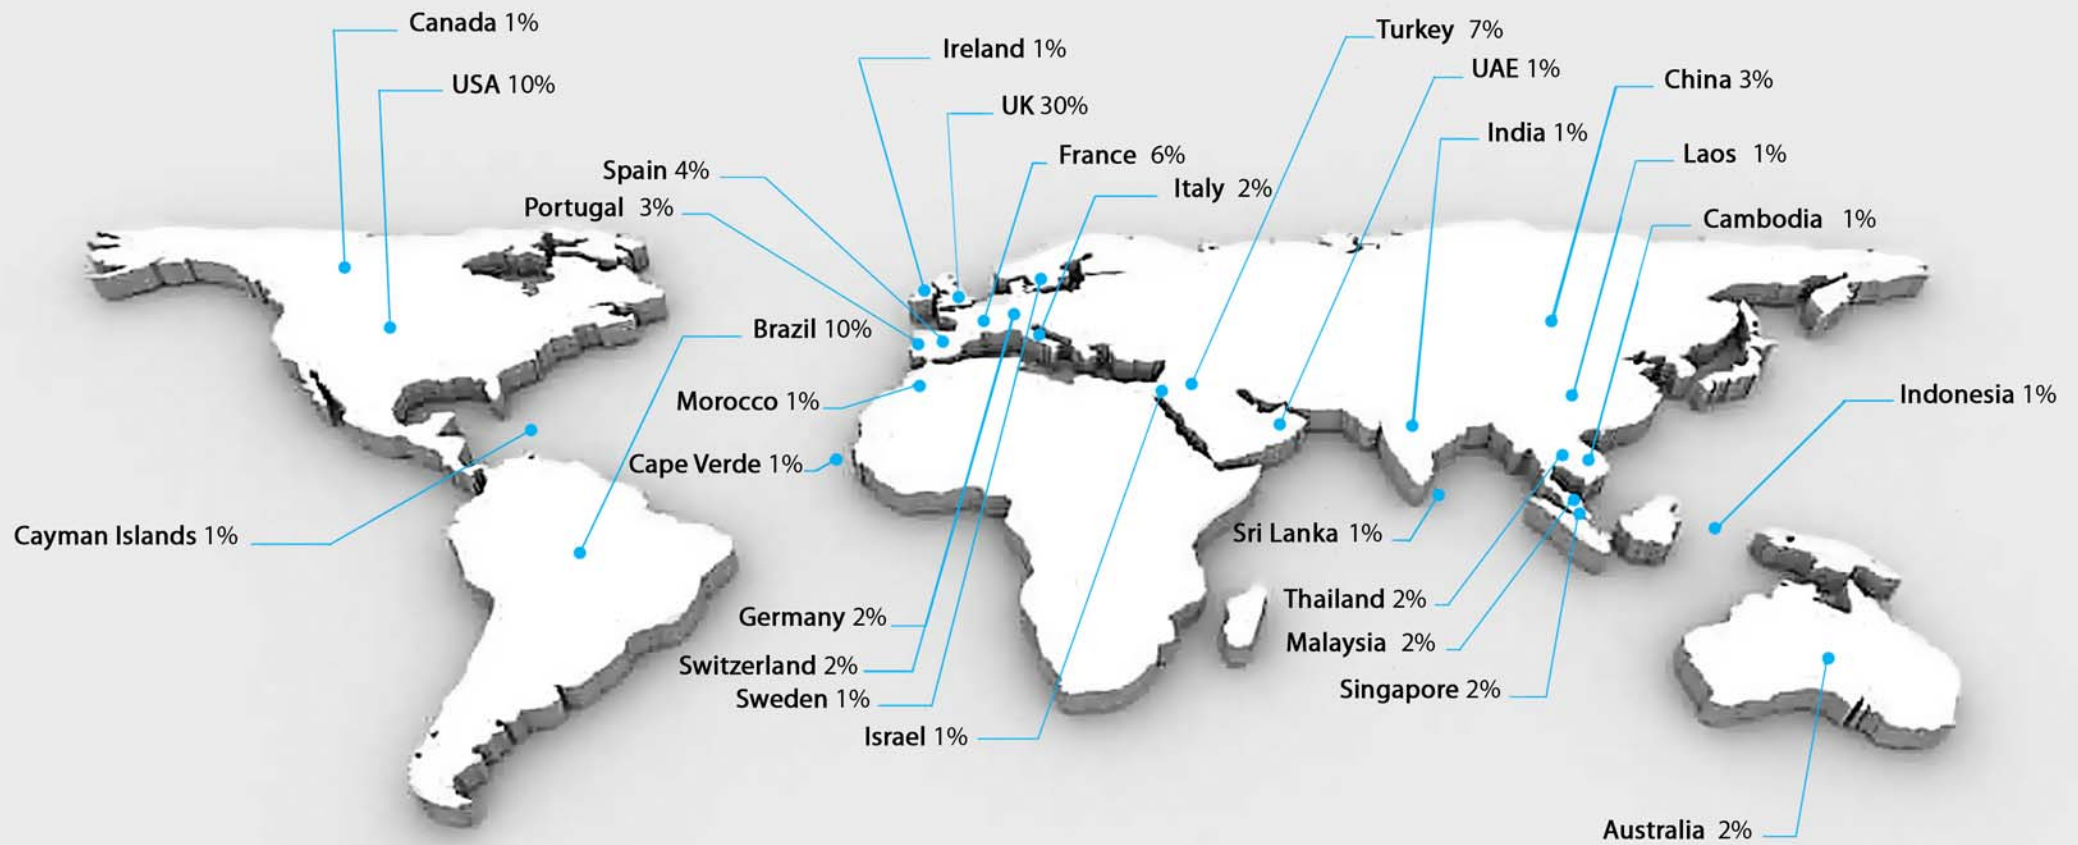

"The consultants at Property Frontiers are very helpful and truthful in their representation of an opportunity. They do not try to push a sale."

What is the main criteria when investing in property?

IF YOU HAD £100,000 IN WHICH COUNTRY WOULD **YOU** CHOOSE TO INVEST?

OVER HALF OF CLIENTS HAVE INVESTED IN THE
LAST 12 MONTHS WITH UK, USA AND ECO PRODUCTS
THE MOST POPULAR

DID YOU KNOW?

The majority of investors (nearly 75%) are looking into alternative and eco products such as our [asset backed bamboo bond](#)
